Technology Use Rules

- Set clear expectations.
- Practice, practice, practice the routine. This will take weeks to develop, and that is okay. Learners thrive on repetition.
- Allow for the extra time within these transitions at first. Once learners get the hang of the routine, they'll need less time.
- Set a warning signal to let students know that they will need to transition soon, so they will begin wrapping up their current station.
- Have all your materials ready.
- Reflect. Regardless of how many years you have been teaching, reflection is key. Each day we need to take a moment and reflect on what worked and what didn't. This is why transitioning in the classroom needs to be continuously tweaked.

THE 3 Ws

1) WHAT?

1) SO WHAT?

1) NOW WHAT?
